Homework 1

Question 1

Implement the two classes along with the main class to test your program.

- `avgSection()`: return the average GPA of the students in the section.
- `secondMaxStudent()`: return the second highest student in the section
- `displayInReverse()`: display the list of students in reverse (backward).
- `addStudents(list2)`: this method receive an array of student to be added to the original array of students and return how many students are added successfully.
